California AB 2998 Compliance Statement

Updated August 2026 — supersedes prior informal compliance statements

At Sileather, we are committed to providing high-quality, innovative materials while prioritizing environmental sustainability and safety. Siotech Corporation (d.b.a. Sileather) manufactures silicone-coated textile products for marine, healthcare, hospitality, transportation, and residential applications. This statement confirms that Sileather-branded silicone-coated textile products are manufactured without intentionally added flame-retardant chemicals restricted under California Assembly Bill 2998 (AB 2998), in effect since January 1, 2020.

Basis for this statement

Sileather's silicone coating chemistry provides inherent flame-resistant properties without relying on intentionally added flame-retardant chemicals. No flame retardants are intentionally added to Sileather's silicone formulation to achieve its performance characteristics.

AB 2998 prohibits the sale of specified new juvenile products, mattresses, and upholstered furniture containing flame-retardant chemicals above 1,000 parts per million — including certain halogenated, organophosphorus, organonitrogen, and nanoscale flame retardants, along with other flame-retardant chemicals identified under applicable California and Washington chemical lists.

Additional Material & Chemical Information

Sileather silicone-coated textiles are manufactured using a solvent-free production process and are PVC- and PU-free. Sileather materials are also manufactured without intentionally added PFAS, antimicrobials, or formaldehyde. Additional chemical compliance documentation, including applicable REACH SVHC, RoHS, and California Proposition 65 documentation, is available upon request.

Scope

This statement applies to Sileather-branded silicone-coated textile products, including their standard textile substrates, as supplied by Siotech Corporation. It does not apply to third-party laminations, adhesives, foams, trims, hardware, or other components subsequently incorporated into a finished product by customers or other parties.

Compliance obligations for finished upholstered furniture or other finished products depend on the complete product construction and components used. Siotech Corporation makes no representation regarding components added by other parties.

Questions about this statement, or requests for supporting documentation, can be directed to marketing@sileather.com or +1 678-404-6363.

Thank you for partnering with Sileather. We're glad to support you as flame-retardant and chemical safety requirements continue to evolve, and we look forward to our continued collaboration toward safer, more sustainable materials for our customers and the planet.
