PFAS-Free Declaration

Updated August 2026 — supersedes the October 1, 2024 declaration

At Sileather, we are committed to providing high-quality, innovative materials while prioritizing environmental sustainability and safety. Siotech Corporation (d.b.a. Sileather) manufactures 100% silicone-coated textiles for marine, healthcare, hospitality, transportation, and residential applications. This declaration confirms that Sileather-branded silicone-coated textile products do not contain intentionally added PFAS (per- and polyfluoroalkyl substances).

Basis for this declaration

Sileather's silicone coating chemistry does not use intentionally added PFAS compounds to provide water repellency, stain resistance, or durability. This is a function of the base silicone chemistry and formulation, not a reformulation undertaken to remove PFAS. This basis is supported by independent testing: Sileather silicone-coated fabrics were tested under OEKO-TEX Standard 100 Edition 04.2025, Annex 4, Product Class I, with independent laboratory testing by Hohenstein reporting non-detect results for tested PFAS compounds and for total fluorine content. Additional chemical compliance documentation, including applicable REACH SVHC and RoHS test reports, is available upon request.

Regulatory context

This declaration is intended to support customers evaluating compliance with applicable state PFAS-in-products requirements, including Minnesota's PFAS reporting requirements and applicable state PFAS-related product restrictions. Customers may retain, cite, or provide this declaration as supplier documentation regarding the PFAS status of Sileather material incorporated into their products. Siotech Corporation makes no representation as to any other party's compliance obligations, which depend on that party's own products, jurisdictions, and legal analysis.

Scope

This declaration applies to Sileather-branded 100% silicone-coated textile products, including the Capri and ChillTech lines and their standard textile substrates, as supplied by Siotech Corporation as of the date below. It does not apply to third-party laminations, adhesives, foams, trims, hardware, or other components subsequently incorporated into a finished product by customers or other parties.

Questions about this declaration, or requests for supporting documentation, can be directed to marketing@sileather.com or +1 678-404-6363.

Thank you for partnering with Sileather. We're glad to support you as PFAS-related requirements continue to evolve, and we look forward to our continued collaboration toward a cleaner, safer, and more sustainable future for our customers and the planet.
